PROFESSIONAL SUMMARY

Frontend Developer with **4 years of experience at Infosys** building enterprise digital banking interfaces for a **Tier-1 UAE retail bank**, supporting retail and corporate customers across the GCC. Strong expertise in **React.js, Next.js, TypeScript, and modern frontend architecture**, with hands-on experience in performance optimization, RTL/Arabic localization, accessibility, testing, reusable component development, and compliance-driven banking workflows including KYC, loans, and account opening. Also experienced in building and integrating **backend services using Node.js, Express.js, REST APIs, MySQL, Prisma, and WebSockets** through production-oriented project

TECHNICAL SKILLS

Frontend: React.js, Next.js 14 (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

State & Data: Redux Toolkit, TanStack Query (React Query), Context API, React Hook Form, Zod

Performance & Accessibility: Core Web Vitals (LCP, CLS, INP), Lighthouse, Code Splitting, Lazy Loading, Memoization, Semantic HTML, ARIA, Keyboard Navigation

Localization: RTL Layout, Arabic i18n, Next.js i18n Routing, CSS Logical Properties

Backend: Node.js, Express.js, REST APIs, MySQL, Prisma, Socket.io, WebSockets

Testing & Tools: Jest, React Testing Library, Git, CI/CD, Vercel, OpenAPI

PROFESSIONAL EXPERIENCE

Infosys Ltd

Frontend Developer (React.js/Next.js)

Hyderabad, India

October 2022 – Present

Client: Tier-1 UAE Retail Bank | GCC Digital Banking Platform

- Develop and maintain **enterprise digital banking applications** using **React.js, Next.js, and TypeScript**, supporting retail and corporate customers across **UAE, KSA, and wider GCC markets**.
- Improved frontend performance by **~30%** through **code splitting, lazy loading, memoization, bundle optimization, and Lighthouse-based Core Web Vitals analysis**, improving application load and rendering performance.
- Reduced redundant API requests by **~40%** using **TanStack Query caching, request deduplication, and controlled refetching**, improving data-fetching efficiency and application responsiveness.
- Implemented **RTL layouts and Arabic localization** across banking modules using **CSS logical properties and internationalization patterns**, ensuring consistent experiences across Arabic and English interfaces.
- Built **type-safe, compliance-focused forms** using **React Hook Form and Zod** for workflows including **KYC, loan applications, and account opening**, improving client-side validation and data integrity.
- Developed **reusable React components and custom TypeScript hooks**, contributing to a shared component architecture and reducing UI duplication across enterprise banking modules.
- Implemented **unit and component testing** with **Jest and React Testing Library** and improved accessibility through **semantic HTML, ARIA attributes, keyboard navigation, and accessible form interactions**.

PROJECTS

JOBPILOT — AI RESUME ANALYSIS & OPTIMIZATION PLATFORM

Live: jobpilot.dilshad.online

Next.js 15 | React | TypeScript | MySQL | Prisma | Vercel AI SDK

- Built and shipped a production AI platform that analyzes resumes against job descriptions and generates personalized optimization recommendations, using Next.js, MySQL, and Prisma.
- Implemented AI-powered resume parsing and streaming AI responses via the Vercel AI SDK, with Zod-based structured output validation to ensure reliable results before they reach the UI.
- Designed secure authentication (NextAuth/Better Auth) with guest-to-user account migration and persistent resume-analysis history.

EDUCATION

MAULANA AZAD NATIONAL URDU UNIVERSITY — Hyderabad, India

Bachelor of Technology (B.Tech) — Computer Science

August 2019 – August 2022
